PD

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings were received on November 23, 2003. These drawings are acceptable.

Election/Restrictions

Applicant's election with traverse of the restriction between Group I, claims 1-10 and 14 to 19, and Group II of claims 11-13 in the reply filed on April 27, 2005 is acknowledged. The traversal is on the ground(s) that claim 11 sets forth the specific details of the lifting mechanism set forth in claim 1, and therefore lists the elements that presumably would make claim 1 allowable. This has been found to be persuasive. The restriction requirement has been dropped as a result, and all claims have been examined

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 to 10 and 14 to 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3673

In line 14 of claim 1 it is unclear which one of the plural parallel links the singular term "said parallel link" is referring to.

In line 3 of claim 4 it is unclear which one of the multiple links is being referred to by the term "said link".

Claim 6 recites the limitation "second actuator portions" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 recites the limitation "second actuator portions" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 10 to 13 are allowed.

Claims 1 to 10 and 14 to 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barge, Jr. and Rudolph show lifting platforms that use parallel link arms with control links which are of particular interest. Tybinkowski et al, Hum, and Ogawa et al show patient imaging platforms that use vertically adjustable patient supports that employ parallel link arms which are of particular interest. Congin et al shows a patient examination table that uses a bellows for covering the vertical lifting arm arrangement which is of general interest.
